

EasyBeet

Recommended Uses

Seedworx EasyBeet blend is great for smoothing off those large or irregular shaped seeds making them easier to handle and help improve on drill singulation. Seedworx EasyBeet can be applied using only water addition and works well in both pan and rotary coating equipment.

Features & Benefits

EasyBeet has an earthy tone with a tan/brown finish, it quickly and easily builds up the size of the seed and readily moulds to a round pellet shape.

- Easy to use pelleting blend
- Lightweight pellet
- Smooths irregular shaped seed
- Self binding capacity
- Can be used for encrustment or to even seed size distribution.

Use	Coating Type			Binding Capacity	Properties				
	Film	Encrust	Pellet		Opacity	Finish	Flow Rating	Dust Control	Colour(s)
Pelleting blend	No	Yes	Yes	Medium	High	Smooth	---	---	Tan

EasyBeet

Physical Properties

Form	Dry powder blend
Colour	Tan/Brown
Solubility	Insoluble

Characteristics

Storage Instructions	Closed container, out of direct sunlight, cool & dry conditions
Shelf Life	24 months when stored correctly

Application Guide

EasyBeet blend should be applied to wet seed, blend should be added gradually while spraying water or polymer mixture. If using for encrustment it is recommended that the product be applied using one of the products from the Seedworx Stix range to increase the coating strength and adherence. The amount required will depend on the seed type, pellet size and strength characteristics sought.
