Ezi-Cote BBG2

Recommended Uses

BBG2 is an economical binder suited for use in grass and pasture seed coating and encrusting.

It can be used in combination with Ezi-Cote EasyCrust or other mineral fillers such as talc or lime.

It is possible to use BBG2 when coating micro-organisms on seed.

It can be supplied colored, or as an uncolored neutral product.

Features and benefits

- Concentrated formulation
- Can be colored with Seedworx colorants
- Easy to handle
- Simple clean up after use
- Micro-organism friendly

Physical Properties

Appearance	cream colored
Density	1.1
pH range	4.5 - 7
Gloss	Low

Characteristics

EPA40CFR180 compliant	Yes
Storage temperature	5 - 35°C
Storage instructions	Closed container, protect from freezing, out of direct sunlight
Shelf life	8 months

Application Guide

Encrusting Use undiluted or dilute up to 50% depending on product requirements.
